WHO AM I?

A software engineer, student, programmer, coder, hacker. I love coding and being a part of the software developer community. You can find me at hackathons hacking away at code and pulling all-nighters. I love contributing to projects and facing new challenges.

EDUCATION

UNIVERSITY OF NEW HAVEN

(2015 – 2019)

BACHELORS OF COMPUTER SCIENCE

I took courses in relational databases, object oriented programming principles, and project management. I also took advance courses in C/C++, Java, and Computer Systems.

A100 CERTIFIED DEVELOPER

(2015 – 2016)

WINTER 2015 COHORT

I learned software development best practices with real world experience. I built Meteor web applications for a personal project and for a venture project for a product owner following Agile methodology.

EMPLOYMENT

ABBOTT JEWELRY SYSTEMS INC.

(2013 – present)

SOFTWARE ENGINEER

I developed in VB.net for a retail management software. I would write readable code and test my code before committing to version control. I followed Agile software development.

SOLUTECH INC.

(2017 – present)

LEAD SOFTWARE ENGINEER

Scrum master for an Agile software development team. I am responsible for a team of developers and shipping software for the product owner and stakeholders. I am also responsible for research and development of new technologies. Primarily working in C# and Android development.

SELF EMPLOYED

(2015 – 2017)

IT TECHNICIAN

I began offering IT services at a young age. Today I have a vast client-base who depend on my services when needed. I started my own business as an entrepreneur so I could help people by doing what I love.
